### *Elite Performer Award*

## Big Lavender Falls Bacopa – *Selecta First Class*

- Very uniform growth habit
- Well branched
- Light lavender flowers that are larger than other varieties
- Flowers prolifically and covers the plant better than other varieties
- Easy to control with PGRs in 4.5 inch container and 10 inch basket

#### Culture Information:

Big lavender falls is very easy to produce in both 4.5 inch containers with one cutting per pot as well as hanging baskets with 4-5 cuttings per basket. To promote even branching, if necessary pinch the cuttings at planting.

#### *Fertilizer:*

200 ppm of nitrogen with every watering.

#### *Plant Growth Regulators in our trials:*

4.5 inch containers - Spray 10 days after planting or pinch with 500 ppm Florel and drench 2 weeks later with 3 ppm Bonzi.

Baskets – Spray 10 days after planting or pinch with 500 ppm Florel and drench 3 weeks later with 3 ppm Bonzi.

All plant growth regulator rates depend on temperature during production. For northern or early southern production, using half of this rate may provide effective control.
