## Introductory Nursery Management, ORH3253C

### Instructor Contact Info

Dr. Kimberly Moore

3205 College Ave. Davie FL 33314

954-577-6328

954-475-4125 (fax)

Email: [klock@ufl.edu](mailto:klock@ufl.edu); Skype: kimberly.moore27

Email/phone messages: students can expect a response within 24 hrs. M-F and within 72 hrs. on weekends. **My preferred way of communicating with students is using email.** I check my UF email frequently every day and on the weekends. If I plan to be out of the office or out of email communication, I will email the class and post an announcement on the class website.

[\[Top\]](#)

### Course Overview

This course presents an overview of planning, organizing, and managing protected horticulture production systems (greenhouses and nurseries) for ornamental and vegetable production. Topics to be covered include layout, growing structures (greenhouse structures), growing systems to manage light and temperature, irrigation and fertilization using soilless substrates, chemical and cultural growth regulators, and insect and disease management.

## Course Prerequisites

This is an introductory course in greenhouse and nursery crop production and management. To be successful, students should have a general knowledge of biology/botany/zoology.

[\[Top\]](#)

## Learning Outcomes

Upon successful completion of this course, students will be able to

1. Demonstrate a comprehensive understanding of greenhouse and protected horticulture industry as a business locally, nationally, and globally.
2. Compare and evaluate different protected structures (greenhouse designs) used to produce high value crops
  - a. Perform simple heating and cooling calculations and costs
  - b. Analyze impact of proper lighting
  - c. Evaluate impacts and relationship among growing substrate, irrigation, and fertilization
3. Develop management plans for successful protected horticulture system that is economical and environmentally sustainable
  - a. Evaluate alternative substrate, fertilizer, and irrigation
  - b. Evaluate different methods for controlling plant growth
  - c. Evaluate integrated pest management system for controlling weeds, insects, and disease

## Acceptable Course Participation

Each week, students are expected (see [schedule](#)) to complete the reading assignment, watch the narrated lecture and submit the weekly assignment (see [course goals and assignments & assessment](#)).

**Discussions:** Discussion posts should be well written and address the issue or question being discussed. All posts should be made within in the week assigned. Discussions will be graded on the quality and timeliness of the response (see discussion grading rubric attachment under syllabus tab). Each student is expected to comment on three fellow class mates' posts. Discussion posts will be accepted up to four days after the due date on the [schedule](#) but will be marked down five points. Each discussion post is worth 25 points.

**Assignments:** Each homework assignment has clear instructions on how to complete the assignment as well as the rubric on how it will be graded. Homework will be accepted up to four days after the due date on the [schedule](#) but will be marked down 5 points. All homework is

May 22, 2016

available under the assignment tab on the class website. Each homework assignment is worth 25 points

**Challenge question:** During the semester, the instructor will issue several challenges. You may work with your classmates to come up with an answer but each student must submit a report. Reports should be written following the guidelines in the rubric attached to the challenge question. Each challenge is worth 25 points.

**Scholar's Ignite:** The Scholar's Ignite Video Presentation is an exciting and fun assignment designed to provide an opportunity for you to generate awareness, stimulate thought, and inspire your peers with horticultural topics or ideas through a short 1-slide, 3-minute multimedia presentation. You will be required to select a topic, prepare a presentation, and present/upload your work to your peers. This assignment is similar to presentations and competitions held at scientific conferences and other academic institutions.

To complete this assignment, you will be responsible for fulfilling the following tasks:

1. Select a presentation topic to research and review. The topic should be selected from a list provided by your instructor. As an alternative, you may develop an idea or identify a topic to present on; however, prior approval from your instructor is required.
2. Develop a 1-slide, 3-minute presentation using computer software. Your instructor may request use of specific software for completion of this assignment or provide you with a list of software along with instructional videos on their use. The presentation should have limited text and rely upon pictures, tables, or graphs to convey your idea(s). Remember that your presentation should be developed for a diverse audience, thus presented information should be comprehensible to individuals without expertise in the subject area.
3. Upload your presentation within Canvas.
4. Your instructor will assign presentations prepared and uploaded by your peers for you to watch, review, and evaluate. Using the rubric provided, provide critical feedback and assign a grade to presentations you were assigned to review.

You will be graded on the following:

1. Communication style: how well did the presenter communicate the topic or information?
2. Comprehension: was the presenter clear and organized?
3. Inspiration and engagement: did the presentation inspire you?
4. Impact: did the presentation have a strong influence on your knowledge or perception?
5. Content: was the presentation content clear and well organized with information pertinent to the subject?

**Crop project:** Everyone is expected to conduct an experiment of their own design to practice growing plants in a greenhouse. Results from your experiment are due at the end of the semester. Students are expected to keep a weekly log of activities and observations

May 22, 2016

throughout the semester. Students may work with a partner but each student must keep a log and turn in a report on their results. This project is worth 100 points

Students are expected to provide feedback on the quality of instruction in this course based on 10 criteria. These evaluations are conducted online at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu>.

### Topics

- Protected horticulture as a business (local, national, global)
  - Marketing and competition
  - Layout and flow
  - Considerations (pots, seeds, - indirect and direct costs)
- Greenhouse structure and design
  - Solar greenhouse
  - High tunnel
  - Hydroponics/aeroponics
  - Shade house
  - Greenhouse/modified greenhouse
  - Gutter connected, saw tooth etc
  - Greenhouse geometry
- Light and temperature
  - Heating and cooling
  - Growth regulators vs natural
- Substrates; soilless media
- Irrigation and fertilization
- Pests
  - Weeds
  - Insects
  - Disease
  - IPM

[\[Top\]](#)

### Assessment

See [schedule](#) for dates. The week begins on Monday (8 am ET) and ends on Sunday (5 pm ET). All discussions or assignments need to be completed by the end of each week (Sunday 5 pm, Eastern time zone). The accepted format for all assignments is MS Word files. If there is a malfunction with the class site or computer malfunctions occur, assignments may be emailed or sent via fax. It is the obligation of the student to inform me of such malfunctions immediately.

May 22, 2016

## TOTAL POSSIBLE POINTS & GRADES = 500 pts

For information on current UF policies for assigning grade points, see <https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

A	(470-500 points)
A-	(450-469 points)
B+	(430-449 points)
B	(415-429 points)
B-	(400-414 points)
C+	(380-399 points)
C	(370-379 points)
C-	(350-369 points)
D+	(330-349 points)
D	(315-329 points)
D-	(300-314points)
E	(0-299 points)

[\[Top\]](#)

## Absences and Make-Up Work

Requirements for class attendance and make-up exams, assignments and other work are consistent with university policies that can be found at:

<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>.

[\[Top\]](#)

## Academic Honesty

As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: "***We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.***" You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: "***On my honor, I have neither given nor received unauthorized aid in doing this assignment.***"

It is assumed that you will complete all work independently in each course unless the instructor provides explicit permission for you to collaborate on course tasks (e.g. assignments, papers, quizzes, exams). Furthermore, as part of your obligation to uphold the Honor Code, you should report any condition that facilitates academic misconduct to appropriate personnel. It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students

May 22, 2016

Office for consideration of disciplinary action. For more information regarding the Student Honor Code, please see: <http://www.dso.ufl.edu/SCCR/honorcodes/honorcode.php>.

## Software Use

All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

## Campus Helping Resources

Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university's counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.

- *University Counseling & Wellness Center, 3190 Radio Road, 352-392-1575, [www.counseling.ufl.edu/cwc/](http://www.counseling.ufl.edu/cwc/)*
  - Counseling Services
  - Groups and Workshops
  - Outreach and Consultation
  - Self-Help Library
  - Training Programs
  - Community Provider Database
- *Career Resource Center, First Floor JWRU, 392-1601, [www.crc.ufl.edu/](http://www.crc.ufl.edu/)*

## Services for Students with Disabilities

The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues. Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation

0001 Reid Hall, 352-392-8565, [www.dso.ufl.edu/drc/](http://www.dso.ufl.edu/drc/)

May 22, 2016

## **Student Complaints**

Each online distance learning program has a process for, and will make every attempt to resolve, student complaints within its academic and administrative departments at the program level. See <http://distance.ufl.edu/student-complaints> for more details.
