

# Evolvulus glomeratus<sup>1</sup>

Edward F. Gilman, Alan Meerow<sup>2</sup>

## Introduction

This finely textured, dense, rounded, low-growing plant eventually becomes a grey-green carpet-like cover accented with a profusion of clear blue flowers (Fig. 1). In areas where hard freezes are infrequent, Blue Daze makes an attractive ground cover with sky blue flowers against the foil of small, silvery-green leaves. Working well as an edging plant, Blue Daze will cascade over the side of a raised planter, container or hanging basket. Small trees are set off very nicely when planted in a bed of Blue Daze. The abundant, small flowers close in the afternoon. New ones open in the morning.

# **General Information**

Scientific name: Evolvulus glomeratus

Pronunciation: ee-VOLV-yoo-lus glom-mur-RAY-tus

Common name(s): Blue Daze Family: Convolvulaceae

Plant type: annual; perennial; herbaceous USDA hardiness zones: 9B through 11 (Fig. 2)

Planting month for zone 9: Apr; May; Jun; Jul; Aug; Sep Planting month for zone 10 and 11: Feb; Mar; Apr; May;

Jun; Jul; Aug; Sep; Oct; Nov; Dec **Origin:** not native to North America

**Uses:** mass planting; border; edging; container or above-ground planter; naturalizing; hanging basket; cascading down a wall **Availablity:** generally available in many areas within its

hardiness range

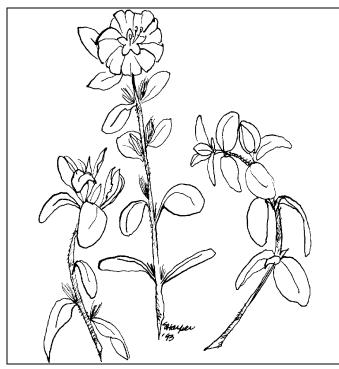

Figure 1. Blue Daze.

# **Description**

Height: .5 to 1 feet Spread: 1 to 2 feet Plant habit: round Plant density: dense Growth rate: moderate

Texture: fine

# **Foliage**

Leaf arrangement: alternate

Leaf type: simple Leaf margin: entire Leaf shape: elliptic (oval) Leaf venation: pinnate

Leaf type and persistence: semi-evergreen Leaf blade length: less than 2 inches Leaf color: blue or blue-green Fall color: not applicable

Fall characteristic: not applicable

## Flower

Flower color: blue

Flower characteristic: year-round flowering

#### Fruit

Fruit shape: unknown Fruit length: unknown Fruit cover: unknown Fruit color: unknown

Fruit characteristic: inconspicuous and not showy

#### **Trunk and Branches**

Trunk/bark/branches: not applicable Current year stem/twig color: not applicable Current year stem/twig thickness: not applicable

# **Culture**

**Light requirement:** plant grows in part shade/part sun **Soil tolerances:** slightly alkaline; sand; acidic; loam

**Drought tolerance:** moderate **Soil salt tolerances:** unknown **Plant spacing:** 12 to 18 inches

## Other

**Roots:** not applicable

Winter interest: no special winter interest

Outstanding plant: plant has outstanding ornamental features

and could be planted more

Invasive potential: not known to be invasive

**Pest resistance:** long-term health usually not affected by pests

# **Use and Management**

Once established, Blue Daze does not require additional watering, in the eastern US, surviving on almost any soil in full sun to partial shade with light fertilizations. Flowering is slightly reduced in partial shade. The leaves wilt during drought but recover with rain. This is almost a no maintenance plant. Plant on 18 to 24-inch centers in an area with good air circulation to prevent fungal infection. Fortunately, the plant is fast-growing and is easily replaced if the fungus problem occurs.

Propagation is by seed or cuttings.

#### **Pests and Diseases**

Blue Daze is susceptible to fungus diseases during rainy season. The soil needs to be well-drained to help prevent root rot
