

Prunus cerasifera 'Thundercloud' 'Thundercloud' Cherry Plum¹

Edward F. Gilman and Dennis G. Watson²

INTRODUCTION

'Thundercloud' Purple-Leaf plum has new foliage which unfolds as ruby red, then turns reddish-purple for the rest of the growing season (Fig. 1). Its fast growth rate and upright to upright-spreading nature quickly forms a 15 to 25-foot-tall, dense silhouette. The small, white to light pink, fragrant springtime flowers, which usually appear before the leaves unfold, are followed by a heavy crop of edible, one-inch-diameter purple fruits.

GENERAL INFORMATION

Scientific name: Prunus cerasifera 'Thundercloud' Pronunciation: PROO-nus sair-uh-SIFF-er-uh Common name(s): 'Thundercloud' Cherry Plum, 'Thundercloud' Purple-Leaf Plum

Family: Rosaceae

USDA hardiness zones: 5 through 8A (Fig. 2)

Origin: not native to North America

Uses: container or above-ground planter; shade tree;

specimen; no proven urban tolerance

Availability: generally available in many areas within

its hardiness range

DESCRIPTION

Height: 15 to 25 feet **Spread:** 15 to 25 feet

Crown uniformity: symmetrical canopy with a regular (or smooth) outline, and individuals have more

or less identical crown forms **Crown shape:** round; vase shape

Crown density: dense

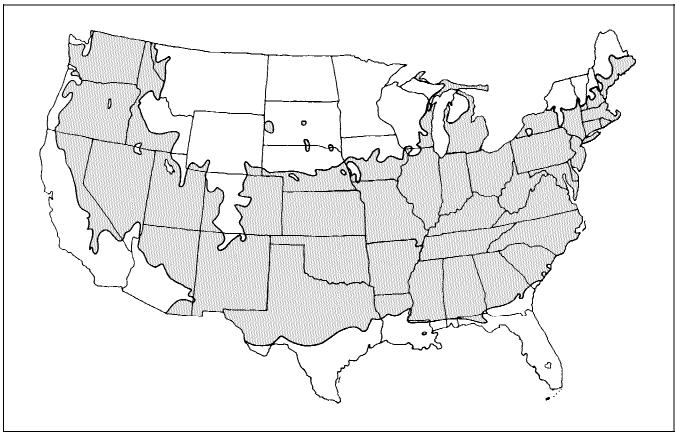

Figure 2. Shaded area represents potential planting range.

Foliage

Leaf arrangement: alternate (Fig. 3)

Leaf type: simple Leaf margin: serrate

Leaf shape: elliptic (oval); obovate; ovate Leaf venation: banchidodrome; pinnate Leaf type and persistence: deciduous

Leaf blade length: 2 to 4 inches; less than 2 inches

Leaf color: purple or red

Fall color: purple

Fall characteristic: showy

Flower

Flower color: pink; white

Flower characteristics: showy; spring flowering

Fruit

Fruit shape: round Fruit length: 1 to 3 inches Fruit covering: fleshy Fruit color: purple

Fruit characteristics: attracts birds; attracts squirrels and other mammals; suited for human consumption;

inconspicuous and not showy; fruit, twigs, or foliage cause significant litter

Trunk and Branches

Trunk/bark/branches: bark is thin and easily damaged from mechanical impact; grow mostly upright and will not droop; not particularly showy; should be

grown with a single leader; no thorns

Pruning requirement: needs little pruning to develop

a strong structure **Breakage:** resistant

Current year twig color: brown; reddish Current year twig thickness: thin

Culture

Light requirement: tree grows in full sun

Soil tolerances: clay; loam; sand; slightly alkaline;

acidic; well-drained

Drought tolerance: moderate **Aerosol salt tolerance:** moderate

Other

Roots: surface roots are usually not a problem
Winter interest: no special winter interest
Outstanding tree: not particularly outstanding
Invasive potential: little, if any, potential at this time
Verticillium wilt susceptibility: susceptible

Pest resistance: very sensitive to one or more pests or diseases which can affect tree health or aesthetics

USE AND MANAGEMENT

Very popular due to the unusual leaf color, many gardeners want one of these things in their yard. But one plant really attracts attention to an area, and it can be overpowering in a small landscape creating a cramped feeling. Due to the strong effect, best used in a large-scale landscape as a single specimen, not in a row or mass planting. It makes a nice, small ornamental near the deck or patio but locate it far enough away so dropping fruit will fall on the lawn or in a groundcover bed. Do not rely on this tree to be around for a long time since decline often begins by the time the tree is 10 to 15-years-old.

Purple-Leaf Plum should be grown in full sun to bring out the richest color of the leaves. Leaves turn almost green in shade and loose the characteristic purple which the buyer is usually looking for. Well-drained soil with an acid pH is preferred but it will grow on slightly alkaline soil. Tolerant of moderate heat and drought, it often succumbs to borers on poor, compacted soil.

Propagation is by cuttings.

Pests

This Cherry Plum is susceptible to aphids, borers, scales, mealy bugs, tent caterpillars and many others. It is not a pest-free plant.

Diseases

Canker and leaf spots.
