**Callicarpa japonica**

Edward F. Gilman

---

**Introduction**

This species of Callicarpa is common in the trade in eastern and southern landscapes. Like other Beautyberries, purple berries are produced in abundance in late summer and fall and persist on the plant after leaves have fallen. The shrub forms the same cascading or weeping effect so common on other Beautyberries. It usually grows to about 6-feet-tall, but can reach 10 feet with a similar spread.

**General Information**

- **Scientific name:** *Callicarpa japonica*
- **Pronunciation:** kal-lick-AR-puh juh-PAW-nick-uh
- **Common name(s):** Japanese Beautyberry
- **Family:** Verbenaceae
- **Plant type:** shrub
- **USDA hardiness zones:** 6 through 8 (Fig. 1)
- **Planting month for zone 7:** year round
- **Planting month for zone 8:** year round
- **Origin:** not native to North America
- **Uses:** foundation; border; mass planting; container or above-ground planter; naturalizing
- **Availability:** somewhat available, may have to go out of the region to find the plant

**Description**

- **Height:** 4 to 6 feet
- **Spread:** 4 to 6 feet
- **Plant habit:** round; spreading; vase shape
- **Plant density:** open

**Growth rate:** moderate
**Texture:** medium

**Foliage**

- **Leaf arrangement:** opposite/subopposite
- **Leaf type:** simple
- **Leaf margin:** serrate
- **Leaf shape:** ovate
- **Leaf venation:** pinnate
- **Leaf type and persistence:** fragrant
- **Leaf blade length:** 2 to 4 inches
- **Leaf color:** green
- **Fall color:** yellow
- **Fall characteristic:** not showy

**Flower**

- **Flower color:** lavender
- **Flower characteristic:** spring flowering

**Fruit**

- **Fruit shape:** round
- **Fruit length:** less than .5 inch
- **Fruit cover:** fleshy
- **Fruit color:** purple
- **Fruit characteristic:** persists on the plant; attracts birds

**Trunk and Branches**

- **Trunk/bark/branches:** not particularly showy; typically multi-trunked or clumping stems
Figure 1. Shaded area represents potential planting range.

Current year stem/twig color: green
Current year stem/twig thickness: thin

Culture

Light requirement: plant grows in part shade/part sun
Soil tolerances: acidic; slightly alkaline; sand; loam; clay
Drought tolerance: moderate
Soil salt tolerances: poor
Plant spacing: 36 to 60 inches

Other

Roots: usually not a problem
Winter interest: no special winter interest
Outstanding plant: not particularly outstanding
Invasive potential: not known to be invasive
Pest resistance: no serious pests are normally seen on the plant

Use and Management

Plants can be massed together spaced 4 to 5 feet apart forming a nice border or divider. Thick growth discourages people from walking through the plant making it well suited for controlling pedestrian traffic. Branches will droop over a wall if planted on top making it well suited for raised planters or containers. Whereas the native American Beautyberry grows too large for many residential landscapes, this plant remains small and in scale with many yards.

Locate in the full sun or partial shade for best form and dense growth. Soils from acid to slightly alkaline should support this plant with little irrigation except in extended drought. Temperatures below zero often kill plants to the ground, but sprouts formed in the spring will flower and produce the showy fruit.

The cultivar ‘Leucocarpa’ has white fruit.
