Duranta repens¹
Edward F. Gilman²

Introduction

This large, fast-growing, multistemmed shrub is popular as a screen or background planting, but is too vigorous and tall to use against the foundation or in small areas. The full clusters of fragrant, pale blue flowers attract butterflies in summer and are followed by bunches of golden-orange berries, popular with birds. Flowers and fruit are often found on the plant simultaneously and make an attractive show. Yellow fruit often hangs on the plant into the winter if the birds don’t eat them.

General Information

Scientific name: Duranta repens
Pronunciation: doo-RAN-tuh REE-penz
Common name(s): Golden Dewdrop, Sky-Flower, Pigeonberry
Family: Verbenaceae
Plant type: shrub
USDA hardiness zones: 9B through 11 (Fig. 1)
Planting month for zone 8: year round
Planting month for zone 9: year round
Planting month for zone 10 and 11: year round
Origin: native to Florida
Uses: border; mass planting; specimen; container or above-ground planter; naturalizing; screen; reclamation plant; espalier; foundation; attracts butterflies; cascading down a wall
Availability: somewhat available, may have to go out of the region to find the plant

Height: 8 to 15 feet
Spread: 10 to 15 feet
Plant habit: round; weeping
Plant density: moderate
Growth rate: fast
Texture: medium

Foliage

Leaf arrangement: whorled
Leaf type: simple
Leaf margin: serrate
Leaf shape: ovate
Leaf venation: brachidodrome; pinnate
Leaf type and persistence: evergreen
Leaf blade length: 2 to 4 inches
Leaf color: green
Fall color: no fall color change
Fall characteristic: not showy

Flower

Flower color: paleblue
Flower characteristic: pleasant fragrance; spring flowering; summer flowering; fall flowering

Fruit

Fruit shape: round
Fruit length: less than .5 inch
Fruit cover: fleshy

Figure 1. Shaded area represents potential planting range.

**Fruit color:** yellow  
**Fruit characteristic:** persists on the plant

**Trunk and Branches**

**Trunk/bark/branches:** not particularly showy; typically multi-trunked or clumping stems  
**Current year stem/twig color:** green  
**Current year stem/twig thickness:** medium

**Culture**

**Light requirement:** plant grows in part shade/part sun  
**Soil tolerances:** slightly alkaline; clay; sand; acidic; loam  
**Drought tolerance:** high  
**Soil salt tolerances:** poor  
**Plant spacing:** 36 to 60 inches

**Other**

**Roots:** usually not a problem  
**Winter interest:** plant has winter interest due to unusual form, nice persistent fruits, showy winter trunk, or winter flowers  
**Outstanding plant:** plant has outstanding ornamental features and could be planted more  
**Invasive potential:** aggressive, spreading plant  
**Pest resistance:** no serious pests are normally seen on the plant

**Use and Management**

Foliage is light green, branches are often droopy and vinelike, and the stems may have sharp spines. When frozen back in the winter, the canes make vigorous recovery and will bloom the next season in USDA hardiness zone 9. Dewdrop will cascade over a wall to form a waterfall of color when in bloom or fruit. Plant on four to six-foot centers to form a dense mass planting.

Preferring full sun and occasional irrigation, Golden Dewdrop will tolerate a wide range of soils and requires no special care once established.

October 1999
A white-flowering cultivar, ‘Alba’, is also available.

Propagation is by seeds or cuttings of firm wood.

Pests include caterpillars, nematodes, and scale.

**Pests and Diseases**

No diseases are of major concern.
