Liriope muscari 'Evergreen Giant'¹

Edward F. Gilman²

Introduction

This large, clumping grasslike perennial makes an attractive, dark green groundcover and is accented with spikes of lilac purple blooms during summer months (Fig. 1). Though not actually spreading by underground stems, an individual plant after several years can reach 24 inches in width by suckering at the base and will quickly cover an open area. Plant on 18-inch centers for the best groundcover effect. Evergreen Giant Liriope can also be used as an edging along walks and other areas. Plant Liriope to create a fine-textured gentle ground cover which will sustain itself for many years. Large areas planted in Liriope lend a soothing effect to any landscape.

General Information

Scientific name: Liriope muscari ‘Evergreen Giant’
Pronunciation: luh-RYE-oh-pee mus-KAR-ree
Common name(s): ‘Evergreen Giant’ Lilyturf, ‘Evergreen Giant’ Liriope
Family: Liliaceae
Plant type: perennial; herbaceous; ornamental grass
USDA hardiness zones: 6 through 10 (Fig. 2)
Planting month for zone 7: year round
Planting month for zone 8: year round
Planting month for zone 9: year round
Planting month for zone 10: year round
Origin: not native to North America
Uses: mass planting; edging; naturalizing; small parking lot islands (< 100 square feet in size); medium-sized parking lot islands (100-200 square feet in size); large parking lot islands (> 200 square feet in size)

Availability: generally available in many areas within its hardiness range

Description

Height: 1 to 2 feet
Spread: 1 to 2 feet
Plant habit: upright
Plant density: moderate

Liriope muscari ‘Evergreen Giant’ -- ‘Evergreen Giant’ Lilyturf

**Growth rate:** moderate
**Texture:** fine

**Foliage**

- **Leaf arrangement:** most emerge from the soil, usually without a stem
- **Leaf type:** simple
- **Leaf margin:** entire
- **Leaf shape:** linear
- **Leaf venation:** parallel
- **Leaf type and persistence:** evergreen
- **Leaf blade length:** 12 to 18 inches
- **Leaf color:** green
- **Fall color:** no fall color change
- **Fall characteristic:** not showy

**Flower**

- **Flower color:** lilac; purple
- **Flower characteristic:** summer flowering

**Fruit**

- **Fruit length:** less than .5 inch
- **Fruit cover:** fleshy
- **Fruit color:** black
- **Fruit characteristic:** showy

**Trunk and Branches**

- **Trunk/bark/branches:** not applicable
- **Current year stem/twig color:** not applicable
- **Current year stem/twig thickness:** not applicable

**Culture**

- **Light requirement:** plant grows in part shade/part sun; plant grows in the shade
- **Soil tolerances:** alkaline; clay; sand; acidic; loam
- **Drought tolerance:** moderate
- **Soil salt tolerances:** unknown
- **Plant spacing:** 18 to 24 inches

October 1999
Other

Roots: not applicable  
Winter interest: no special winter interest  
Outstanding plant: not particularly outstanding  
Invasive potential: not known to be invasive  
Pest resistance: no serious pests are normally seen on the plant

Use and Management

Evergreen Giant Liriope enjoys more sun than other liriopes. Growth in full shade is a bit thin but acceptable. Growth is best on rich, moist, well-drained soils but will accept much less hospitable conditions in most regions. In the hottest areas of the south, however, full sun plants tend to brown at the tips and die from heat stress. Plants should be fertilized once or twice a year but require little care otherwise.

Propagation is by division of the clumps or by seed.

Problems include mites, slugs, snails, and scale.

Pests and Diseases

No diseases are of major concern.
