**Philodendron martianum**

Edward F. Gilman

**Introduction**

This dark green philodendron has six to eight-inch-wide leaves which are 18 inches long (Fig. 1). Flask Philodendron is well-suited to use as an accent or specimen planting or in mass as a groundcover or low shrub. It would be hard to find a small plant with a coarser texture. Plant on three to four foot centers in a mass planting to create a solid dark green two foot tall ground cover, or as a single specimen in a small-scale garden.

Use and Management

It grows best in deep shade locations in well-drained soil, and is somewhat salt-tolerant. It can bring to life a dark area of the landscape with an overstory of trees. Normally used for making crosses in the nursery trade, Flask Philodendron may be hard to come by in retail garden centers.

Propagation is by seed or cuttings.

Pest problems include mites, scale, and mealy bugs.

Pests and Diseases

The leaves are susceptible to fungal leaf spot diseases.
