Elite Performer Award

Fame Electric Purple Petunia – Selecta First Class

- Very uniform, well branched, and mounding growth habit
- Average vigor
- Versatile, works well in combinations because it is not too vigorous
- Flowers quickly for early finish
- Covered in flowers at finish
- Works well with PGRs in 4.5 inch containers and 10 inch baskets

Culture Information:
Famous Electric Purple is well suited for production in both 4.5 inch containers with one cutting per pot as well as hanging baskets with 3-4 cuttings per basket. To promote even branching, if necessary pinch the cuttings at planting.

Fertilizer:
200 ppm of nitrogen with every watering.

Plant Growth Regulators in our trials:
4.5 inch containers – Spray 2.5 weeks after planting or pinch with 2500 ppm B-Nine and drench one week later with 4 ppm Bonzi. For a more mature container, a second drench may be needed 10 days after the first drench with 2 ppm Bonzi.

Baskets – Spray 2.5 weeks after planting or pinch with 2500 ppm B-Nine and drench one week later with 4 ppm Bonzi.

All plant growth regulator rates depend on temperature during production. For northern or early southern production, using half of this rate may provide effective control.
