Merit Award

MiniFamous Cherry Pink Calibrachoa –

Selecta First Class

- Large flowers
- Intense flower color
- Slightly vigorous
- Responsive to growth regulators
- Nice semi-trailing plant form

Culture Information:

MiniFamous Cherry Pink can be produced in both 4.5 inch containers with one cutting per pot as well as hanging baskets with 4 cuttings per basket. To promote even branching, if necessary pinch the cuttings at planting.

Fertilizer:

200 ppm of nitrogen with every watering.

Note: Calibrachoa grow best at pH below 6.0.

Plant Growth Regulators in our trials:

4.5 inch containers – Spray 3 weeks after planting or pinch with 2500 ppm B-Nine, and drench 1 week after B-Nine spray with 0.5 ppm Sumagic.

Baskets – Spray 3 weeks after planting or pinch with 2500 ppm B-Nine, and drench 2 weeks after B-Nine spray with 0.5 ppm Sumagic.

All plant growth regulator rates depend on temperature during production. For northern or early southern production, using half of this rate may provide effective control.
