Greenhouse performance

Merit Award

MiniFamous Peach Calibrachoa –

Selecta First Class

- Nice, unique flower color
- Good branching
- Can be produced in 4.5 inch container and hanging basket
- Quick flowering in mid and late season plantings
- Long day requirement delays flowering in early plantings

Culture Information:

MiniFamous Peach is well suited for production in both 4.5 inch containers with one cutting per pot as well as hanging baskets with 4 cuttings per basket. To promote even branching, if necessary pinch the cuttings at planting.

Fertilizer:

200 ppm of nitrogen with every watering.

Note: Calibrachoa grow best at pH below 6.0.

Plant Growth Regulators in our trials:

4.5 inch containers – Spray 3 weeks after planting or pinch with 2500 ppm B-Nine.

Baskets – Spray 3 weeks after planting or pinch with 2500 ppm B-Nine.

All plant growth regulator rates depend on temperature during production. For northern or early southern production, using half of this rate may provide effective control.
