Merit Award

Cameo Scarlet Surprise Double Impatiens – *Oglevee Ltd.*

- Early flowering
- Attractive color and pattern with white on scarlet
- Many medium size flowers
- Flowers held above foliage
- Slightly vigorous
- Works well with PGRs in baskets and 4 inch containers

Culture Information:

Cameo Scarlet Surprise is well suited for production in both 4.5 inch containers with one cutting per pot as well as hanging baskets with 4-5 cuttings per basket. To promote even branching, if necessary pinch the cuttings one week after planting.

Fertilizer:

200 ppm of nitrogen with every watering.

Plant Growth Regulators in our trials:

4.5 inch containers - Drench 10 days after planting or pinch with 1 ppm Bonzi.

Baskets – Drench 2 weeks after planting or pinch with 1 ppm Bonzi.

All plant growth regulator rates depend on temperature during production. For northern or early southern production, using half of this rate may provide effective control.
